
textlines Documentation

Release 0.0.1

November 21, 2013

Contents

Sparklines for text. `text_lines` counts your words, paragraphs, pages and emits a short summary.

This text doesn't need to be here, but I'm trying to write a new paragraph.

```
textlines.reading_time (num_words)
```

```
textlines.talking_time (num_words)
```

```
textlines.text_lines (words)
```

```
textlines.work_percentage (words, length)
```

Python Module Index

t

textlines,??
